DETAILED ACTION

Reasons for Allowance

1. 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 11, the closest prior art of record, Figure 1 or Figure 2 discloses a switching amplifier comprising a first switch (mp1), a second switch (mn1), a third switch (mp2), a fourth switch (mn2) wherein each transistor having a respective control terminal (gate of each respective transistor), a first output terminal (OUTP) which is disposed between the first switch (mp1) and the second switch (mn1), and a second output terminal (OUTN) which is disposed between the third switch (mp2) and the fourth switch (mn2). As described above, Figure 1 or Figure 2 discloses all the limitations in the claims except for that the control circuit coupled to the four switches such that no voltage differential is generated between the first output terminal (OUTP) and the second output terminal (OUTN) in a first state of operation (Figure 5 or Figure 6 of drawing describes the first state of operation). This unique functional limitation is not taught or suggested by prior art or in combination of other references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
